

Демонстрація прикладів

- PR, який був успішно злитий в основну гілку після проходження усіх перевірок

The screenshot displays a GitHub Pull Request interface. At the top, a green circle icon with a white checkmark is next to the text "All checks have passed" and "1 skipped, 3 successful checks". Below this, a section titled "1 skipped check" shows a CI/CD Pipeline / deploy (pull_request) status as "Skipped 3 minutes ago". A section titled "3 successful checks" lists three CI/CD Pipeline tasks: "docker (pull_request)" (Successful in 26s), "lint (pull_request)" (Successful in 18s), and "test (pull_request)" (Successful in 38s). Below these, a green checkmark icon is next to the text "No conflicts with base branch" and "Merging can be performed automatically." At the bottom, a green button labeled "Merge pull request" is visible, along with a link to "View command line instructions." In the bottom right corner, the text "Still in progress? Convert to draft" is present.
